SUBJECT: **User Notice #1: ASG100 Selected Small Lot Numbers**

This is a notice that 6 very small lots of the model ASG100 N95 Particulate Filtering Respirator (TC-84A-9284) require additional sampling for pressure testing. We have no indication from previous testing of these lots that there is any issue with the product, and we have confidence they will pass additional testing.

The affected lots of ASG100 finished goods are listed below. The lot codes can be found on the side of the master case and on the bottom of the carton.

- 44226-2
- 44228-2
- 44247-3
- 44260-3
- 44261-3
- 44249-3

If you are in possession of any ASG100 product in the 6 lots, please isolate the product and notify Advoque SafeGuard Quality Control (qc@advoquesafeguard.com).

Advoque SafeGuard will post a followup notice when the lots are cleared for use.

Sincerely,

Jason Azevedo
